

Joseph is very forgetful, so he misses homework deadlines that are now across multiple different websites because of Covid 19. He would like to be a good scholar but times are very different from when he started school .

His friend Arnold realizes his buddy is struggling and offers him a flash drive with our Calendar app pre installed on it.

Joseph links all his school accounts and begins the process of creating a schedule. Finding it really easy to customize .

Joseph gets notifications as many days before assignments are due as needed because sometimes he forgets to check the calendar app .

Joseph now has more freedom than ever and takes up new hobbies to fill his free time .

Joseph and Arnold now own a ship and sail around the globe all because of the time Joseph could save with the calendar app and all the money Joseph makes as a dentist after college.

Bob can't make any money because he constantly misses all of his scheduled appointments. He finds himself trying to remember all of the dates he sets.

1

They tell him to try and use our scheduling application. It will make sure all of his dates and appointments are listed out and he should never miss another appointment.

3

He continues using the app and all of his schedules are not missed any longer. Bob is no longer upset at himself and he is being successful now.

5

He continues to search for ways to help him keep up with his appointments. So, he asks his few friends how they keep up with all of their appointments.

2

Bob begins to list all of his appointments into the scheduling application and realizes how many appointments he's scheduled at the same time. He is frustrated with himself.

4

Bob has been using our scheduling application for over a year now, and he is very successful. His bank account has never been better. Bob is his happiest self thanks to our scheduling app.

John Smith has had trouble keeping up with his busy schedule as he adjusts to his classes online. He spends a lot of time looking at which platform each class meets in and how they take attendance.

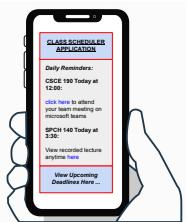

John is late for work after losing track of time figuring out his schedule for the semester.

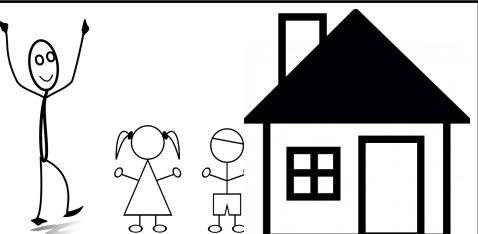

In class his teacher brings up a helpful app that notifies you of your upcoming class times and due dates, and directs you to the appropriate platform to attend class.

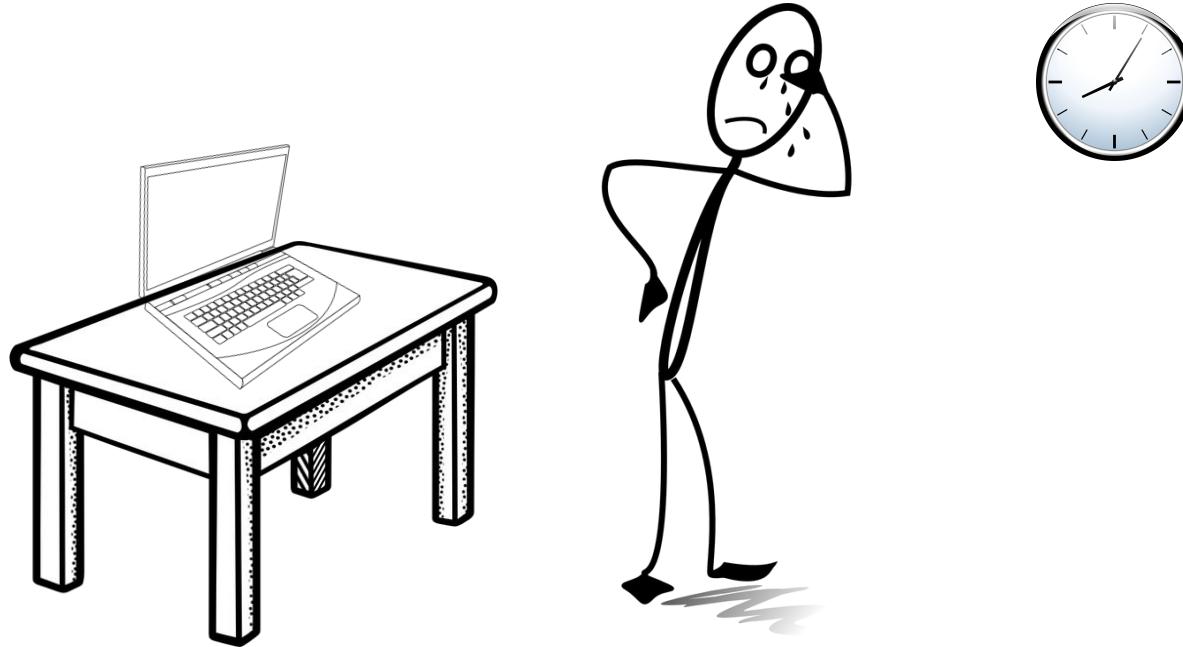

John downloads the app and gets started with inputting his classes and platforms for daily reminders.

John has now fully set up his app and now gets daily reminders of his class schedules and deadlines, he can just click on the class to direct him to the platform the class is on.

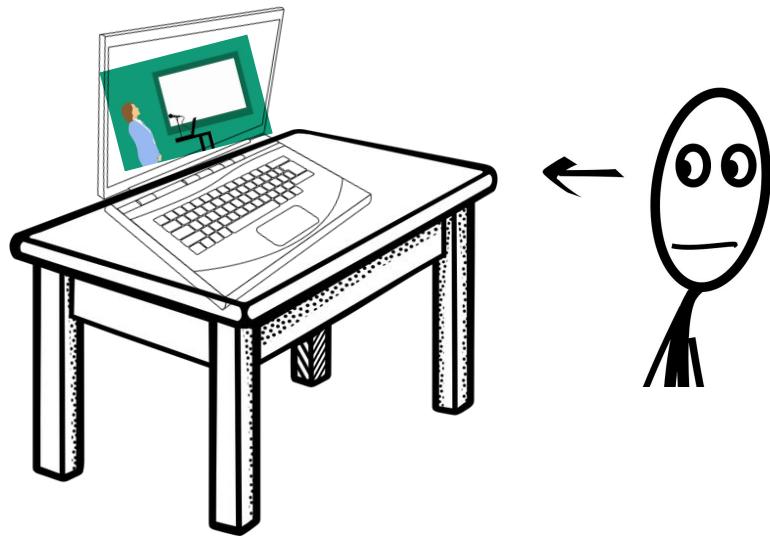

John is able to stay on top of his classes much easier now and has more time to spend with his family, he has not been late to work since!
